(*Journal of Molecular Structure, Vol. 150*)

SUBJECT INDEX

Acrylic acid,
reaction potential map analysis of site selectivity of acrylic acid and acrylonitrile 289
Acrylonitrile,
reaction potential map analysis of site selectivity of acrylic acid and acrylonitrile 289
Ammonia dimers,
ab initio calculations of the vibrational force field and IR intensities of ammonia dimers 223
Ar,
optimized Gaussian basis sets for excited states of Ar, Ar^+ and He 203
Aspartyl proteinases,
theoretical investigations of structure and enzymatic mechanisms of aspartyl proteinases. Part I. Ab-initio calculations on an active site model: hydrogen diformiate with H_2O and H_3O^+ 241
Azines,
protonation of azines: an ab initio molecular orbital study 135

Benzalazine derivatives,
structural studies of mesogen benzalazine derivatives. Part I. Semiempirical MO calculations (CNDO/2, MNDO) on intramolecular H-bond and vicinal interactions 1
Benzenoid hydrocarbons,
topological properties of benzenoid hydrocarbons. Part XLIV. Obvious and concealed non-Kekuléan benzenoids 157
Bicyclo(3.1.0)hexane,
a critical comparison of the ab initio geometry and zero-point-average structure of bicyclo(3.1.0)hexane 121
Bicyclo[1.1.0]tetraarsane,
the molecular structure of bicyclo[1.1.0]tetraarsane from ab initio calculations using analytical gradients 283
Binary alloys,
an iterative semi-empirical method for the study of large-size metal aggregates. Part III. Preferential distribution of atoms in some binary alloys 17

Carbon dioxide,
ab initio study of the hydration of carbon dioxide: additional comments based on refined calculations 319
$CF_3CH_2^{\bullet}$, $CH_3CF_2^{\bullet}$,
structures and conformational analysis of the fluorinated ethyl radicals of $CF_3CH_2^{\bullet}$, $CH_3CF_2^{\bullet}$, and $CF_3CF_2^{\bullet}$: an ab initio SCF MO study 93
$C_4H_9^+$,
on $C_4H_9^+$ energy hypersurface 33
CH bond lengths,
effect of conjugation beyond multiple bonds. Part IV. On out-of-plane CH bond lengths 73
Chlorine fluorides,
ab initio investigation of chlorine fluorides ClF_k (k = 1—7) 171
CO^+,
semiempirical potential curves of N_2^+ and CO^+ computed with the MS-Xα theory 215
Cycloalkanones,
ring size effect on the proton affinity of cycloalkanones — a MINDO/3 theoretical study 129
Cyclopropane,
the electronic and molecular structure of cyclopropane, isocyanomethane and isocyanocyclopropane 297

Diatomic halogens,
an SCF-MS-Xα study of the bonding and nuclear quadrupole coupling in diatomic halogens and interhalogens in the ground $X^1\Sigma$ and $B^3\Pi_0$ excited states 327

Esters,
theoretical study on the hydroxide ion addition to esters 251
Ethyl radicals,
1,2-rearrangement of protonated-hetero-substituents in ethyl radicals: a molecular orbital study 51

GeH_3,
theoretical study of the geometry of GeH_3 and electronic structure of SiH_3 and GeH_3 189
Green matrix method,
comparison of the transfer and Green matrix method for the surface problem in periodic chains 267

He,
optimized Gaussian basis sets for excited states of Ar, Ar^+ and He 203
Hydrocarbons,
vibrational force fields for strained hydrocarbons involving *exo*-double bonds. An ab initio study 259
Hydrogen diformiate,
theoretical investigations of structure and enzymatic mechanisms of aspartyl proteinases. Part I. Ab-initio calculations on an active site model: hydrogen diformiate with H_2O and H_3O^+ 241
Hydronium ion,
the 20-hydrated hydronium ion cluster energy and structure 391

Interhalogens,
an SCF-MS-Xα study of the bonding and nuclear quadrupole coupling in diatomic halogens and interhalogens in the ground $X^1\Sigma$ and $B^3\Pi_0$ excited states 327
Isocyanomethane,
the electronic and molecular structure of cyclopropane, isocyanomethane and isocyanocyclopropane 297

Metal aggregates,
an iterative semi-empirical method for the study of large-size metal aggregates. Part III. Preferential distribution of atoms in some binary alloys 17
Methyl and ethyl radicals,
theoretical study of the vibrational frequencies of fluorinated methyl and ethyl radicals 109
Methyl formate,
a comparative ab initio study of methyl formate, methyl thiolformate and methyl thionoformate 381
3-Methylene-1,4-pentadiene,
conformational analysis of 3-methylene-1,4-pentadiene using molecular mechanics and quantum mechanical calculations 85
Monoheterocyclopropenes,
Green's function ab initio study of the outer valence ionization energies of monoheterocyclopropenes 67

N_2^+,
semiempirical potential curves of N_2^+ and CO^+ computed with the MS-Xα theory 215
$NaHe^+$,
energies and radial couplings for the $^1\Sigma$ and $^3\Sigma$ states of the $NaHe^+$ quasimolecule 345

Organic azides,
the vibrational spectra, molecular structure and conformation of organic azides. Part IV. An ab initio study of hydrazoic acid, azidomethane, azidoethane, azidoethene and azidomethanal 361

Promolecule model,
second moments and diamagnetic susceptibilities in Van der Waals complexes by the promolecule model 77

SiH_3,
theoretical study of the geometry of GeH_3 and electronic structure of SiH_3 and GeH_3 189
Sulfur dioxide,
CNDO/2 parameterization and the role of *d* orbitals in the bonding of sulfur dioxide and tellurium monoxide, dioxide and dihydride 151

Tautomerization,
properties of the optimal environment inducing tautomerization of complementary base pairs 235
Tellurium monoxide,
CNDO/2 parameterization and the role of *d* orbitals in the bonding of sulfur dioxide and tellurium monoxide, dioxide and dihydride 151

Uracil,
a semiempirical HAM/3 study of core-electron binding energies for uracil and its related molecules 309
